

CLAIMS

I claim:

1. A device for pasting wallpaper, comprising:
 - a main body member;
 - a means for receiving a wallpaper roll, disposed on said main body member;
 - a first vertical member for containing adhesive, disposed within said main body member;
 - a second vertical member for containing adhesive, disposed within said main body member;
 - adjustment pieces in communication with said first vertical member and said second vertical member for containing said adhesive, each of said adjustment pieces having a knob that a user can turn with the user's hand to adjust the height of said first vertical member and said second vertical member.
2. The device of claim 1, wherein said adjustment members permit adjustment of said first vertical member and said second vertical member with one of the user's hands, while the user's other hand manipulates the wallpaper under said first vertical member and said second vertical member.
3. The device of claim 1, further comprising a counter in communication with said main body member.
4. The device of claim 1, further comprising a workbench disposed underneath said main body member.
